

## 12” Viola Combo

Item # 1649213

The bright faces of Viola flowers combined with the vibrant Snapdragon blooms help clear away the winter blues. You can plant them in your garden or simply set them outside to brighten your patio. Place them in sun or partial shade and water when dry. Viola blooms do not need deadheading making them an easy, colorful addition to your patio. They can be planted at garden’s edge, in rock gardens or as a small-scale ground cover. Violas and Snapdragons prefer cool weather and are excellent with spring and fall blooming plants. Temperatures below 25°F are too cold for Violas and Snapdragons, bring them indoors or into a garage.

### How to Grow:

- Plant in sun or partial shade
- Prefers cool weather
- Blooms spring and fall
- Water when dry
- Grows 6-9” tall
- Space 6” apart

Warning: Not for Human or Animal Consumption
