

16" Color Bowl

Item # 468222

The cheery bright faces of Pansy flowers help clear away the winter blues. You can plant them in your garden or simply set them outside to brighten your patio. Place them in sun or partial shade and water when dry. Deadheading your Pansies can prolong bloom time. They can be planted at garden's edge, in rock gardens or as a small-scale ground cover. Pansies prefer cool weather and are excellent with spring and fall blooming plants. Temperatures below 25°F are too cold for Pansies, bring them indoors or into a garage.

How to Grow:

Plant in sun or partial shade

Prefers cool weather

Blooms spring and fall

Water when dry

Grows 6-9" tall

Space 6" apart
