

12” Hibiscus Tree Item# 67902

Hibiscus trees with their stunning large blooms are an easy way to add a tropical flair to your garden. They also attract hummingbirds and butterflies. Perfect for container gardening, just make sure the pot has excellent drainage. They grow best in temperatures between 60F – 90F and cannot tolerate temps below 40F. Your hibiscus may need daily watering in warm weather.

How to Grow:

- Plant in full sun to partial sun

- Keep soil evenly moist, but not sitting in water

- Fertilize once a week

- Remove dead blooms and leaves
