

10" Easter Lily Item# 866045

A cool room in your home with plenty of bright indirect light is the perfect location for your Easter lily. Water your lily when the soil is dry. Most lilies are not pet friendly and should be kept away from your animal companions. The yellow anthers in the flower center can easily be removed to avoid stains on clothing or tablecloths. After your lily finishes blooming, the bulbs can be planted in a sunny spot in your garden to be enjoyed next year! Easter lilies naturally bloom in June and July.

How to Grow Indoors:

- Place in bright indirect light
- Water when dry

How to Grow Outdoors:

- Plant outdoors after flowering
- Plant in sun to partial sun
- Blooms in June/July
